

PRODUCT BULLETIN | EOL NOTICE – DELL 7220 TABLET DOCKING STATIONS AS7.D920.XXX PART NUMBERS

May 16th 2024

This is an advanced notice of PMT's intent for the below listed part numbers for docking stations only (cradles excluded) for Dell 7220 Tablet and older (AS7.D920.xxx range of DOCK part numbers) to be End Of Life and no longer available to order.

There is currently a limited supply remaining and once these have been depleted no more orders will be accepted – a further communication will be issued once this stage is reached and order acceptance has closed. We will continue to offer support and service for these models moving forward.

Cradles (without electronics or port replication, part numbers AS7.D920.104 and AS7.D920.104-PS) will be unaffected and continue to be available.

This change will assist us in more accurately managing inventory and provide better clarity to our customers around the status of this product line before final production stops.

We thank you for your cooperation and assistance during the implementation of this change. If you have any questions or need assistance please reach out to our inside sales team at sales@precisionmounts.com or +1 888-869-7652.
